

# PRINCE2®

## Practitioner or Re-registration Course

### (Projects in Controlled Environments)

The PRINCE2® Practitioner Course prepares participants for the PRINCE2® Practitioners exam and focuses on the practical application of a case study encompassing the most essential elements of a PRINCE2® project.

### Overview

Participants will explore the relationship between the Business Case and the project, and develop specific PRINCE2® products during the course.

### Key Outcomes

- Describe and apply all facets of the PRINCE2® Principles, Themes and Processes and tailor each to a specific project
- Set up and manage complex projects
- Identify and control risks throughout the project
- Ensure a focus on quality is maintained throughout the project
- Monitor the objectives of a project and the essential adjustments needed to respond to changes in the environment

### Course Outline

- Relationship between the Business Case, programmes and the project
- PRINCE2® Principles – continued business justification, learning from experience, defined roles and responsibilities, manage by stages, manage by exception, focus on products, tailor to suit the needs of the project environment
- PRINCE2® Processes – starting up a project, initiating a project, directing a project, controlling a stage, managing product delivery, managing stage boundaries, closing a project
- PRINCE2® Themes – business case, organisation, quality, plans, risk, change and progress
